

Are you starting to notice something very strange is going on with the whole "coronavirus pandemic"?

Exactly what is wrong with it? What kind of future are we being led to?

If we don't start to wake up now, this ridiculous lifestyle will continue forever.

NO!! TO THE NEW NORMAL

that takes away our childrens future and happiness

Held in Tokyo Regularly!

Is the new normal really for the well being and protection of our health???

Despite many doctors pointing out that this New Normal has no medical basis, our daily lives are being forcibly rewritten.

With the media repeatedly inciting fear about the number of "infected cases", and despite all the information circulating the internet about the inflated death figures by the Health Ministry and the Unreliability of the PCR test, is the Media really being transparent and telling the truth?

Each of us must critically think, share our ideas, in order to protect the future for our children, our society, and for our country!

TV and Newspapers really telling the truth?
