#### Say No to the control measures!

There is no convincing evidence that the actual coronavirus has ever been isolated and shown to exist. The only basis for its "existence" is a chinese thesis. created in a mere 10 days, which was published to the scientific journal, Nature. In the traditional process of isolating and classifying a new pathogen, it is said to take roughly a year!!However the WHO would accept this chinese thesis as fact and went on to impose PCR tests as the method of testing, advising restraints for economic activities and schools, wearing of mandatory masks, and an imposition of the New Normal lifestyle. All this, for a virus never shown to exist, and the so called virus "control measures" that do more harm than good.

### Take off your Mask!

Masks cannot prevent viruses. The space between the fabric of your mask is about 50 times the size of viral particles. Constant wearing of masks can lead to the following: High concentration of Carbon Dioxide turning cells into cancerous cells. Lowering of the immune system, hyperthermia, increased heart rate, hypoxia, lung infection from bacteria and germs attached to masks, infections on your face, bad breath. 
Respiratory illness due to materials of the mask(petroleum based materials), communication disorder for our youth. Also, there is no scientific basis on "asymptomatic

transmission", which led to the encouragement of mask wearing.

Say No to peer pressure!

## Stop the PCR test!

"The PCR test must not be used to diagnose infectious diseases(such as the covid19)". These are the words of the inventor of the test, Kary Mullis (died in August 2019).

The PCR test will detect indigenous viruses that coexist in our bodies, therefore even a healthy person can test positive. The Media is falsely reporting people testing "positive" as people being "infected". Asymptomatic but treated as infected?! We must realize that there is a great trick being played on us! Despite the massively increased tests, almost 100% of the people being positive, have no symptoms. As long as we keep blindly taking these tests, this fake pandemic will continue on.

#### No to the Poison Vaccines!

Mercury (serious health hazard),Aluminum (cause of dementia), formalin (sick house syndrome), Polysorbate 80 (infertility), aborted fetal cells ... These are some of the substances included in vaccines. The Covid19 <RNA> vaccine, which was developed at a suspiciously fast rate, rewrites the genetic information of the vaccine intaker.

What might the agenda be? The answer is clear. Bill <del>Oates</del>, who is quoted in saying that **"vaccines are effective in reducing population"**, is a major funder of these vaccine projects. It is highly likely that approximately 270,000 people will have serious side effects, if

all the citizens are vaccinated.
